

Course Overview

6.S063 Engineering Interaction Technologies

Prof. Stefanie Mueller | MIT CSAIL | HCI Engineering Group

instructor: Stefanie Mueller

Assistant Professor, MIT EECS / MechE

Research:

Human-Computer Interaction
& Rapid Prototyping

TA: Jared Counts

MEng, course 6.3

enrollment

admission::

at the end of this class,
we will pass around a sign up sheet.

you **must sign in today**
to stay enrolled in the class.

Signup Sheet

6.S063 Engineering Interactive Technologies (Fall 2017)

[illegible]

enrolled / waitlisted::

I will send an **email today**
with enrolled / waitlist notifications.

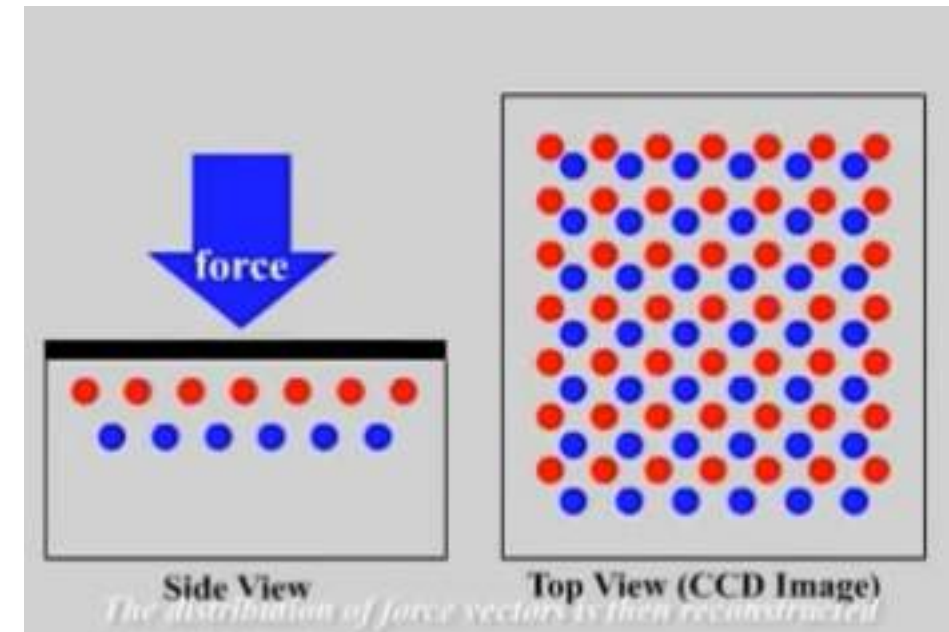

goal of this course

#1

learn

- about different **fields of interactive technologies**
- how the technology evolved over time
- how the underlying engineering concepts developed

multi-touch technology, augmented reality, haptics, shape changing interfaces...

multi-touch technology

augmented reality

haptics

wearable computing

brain computer interfaces

sound interfaces

shape changing interfaces

natural user interfaces

telepresence systems

[...]

what would be the **benefit** of
knowing how tech developed over the last 30 years?

<30s brainstorming>

what would be the **benefit** of knowing how tech developed over the last 30 years?

- be able to **predict** what comes next
- **invent** the next big tech
- useful if you want to have a **startup** or for **research**

#2

learn

- practical **engineering skills**
- required to build those interactive technologies yourself.

laser cutting, 3D printing, electronics, breadboarding...

laser cutting

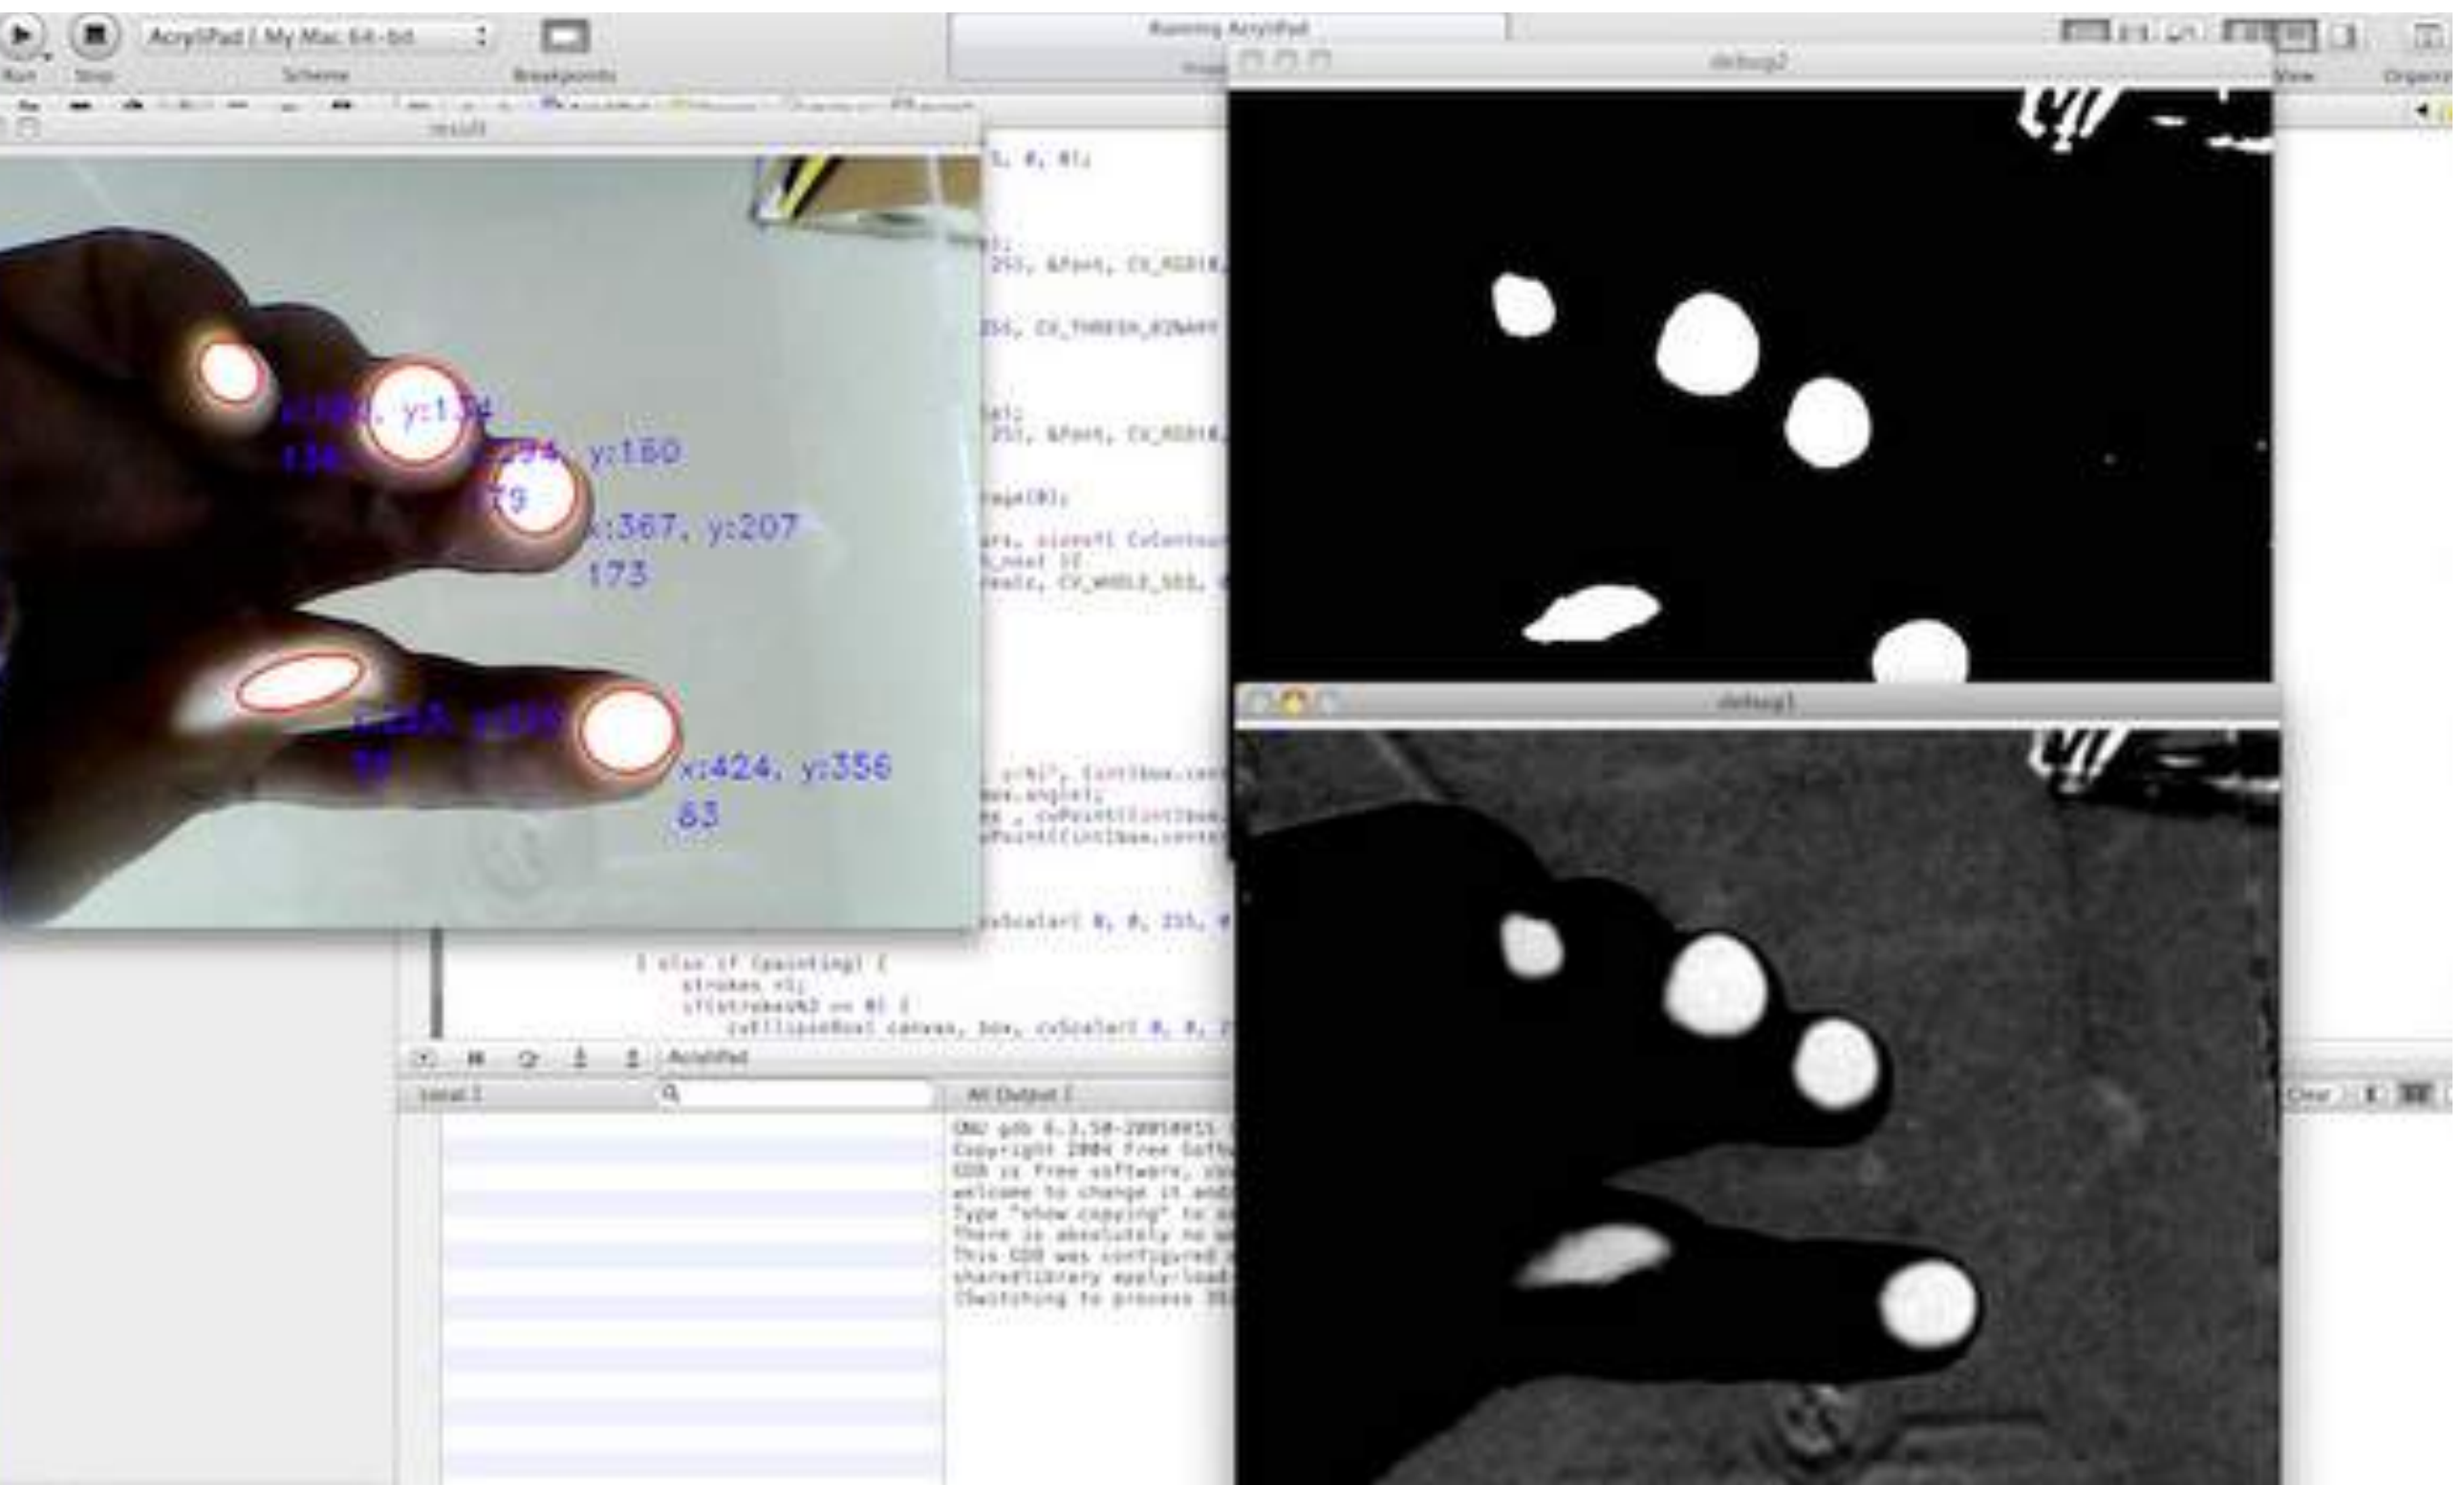

3D printing

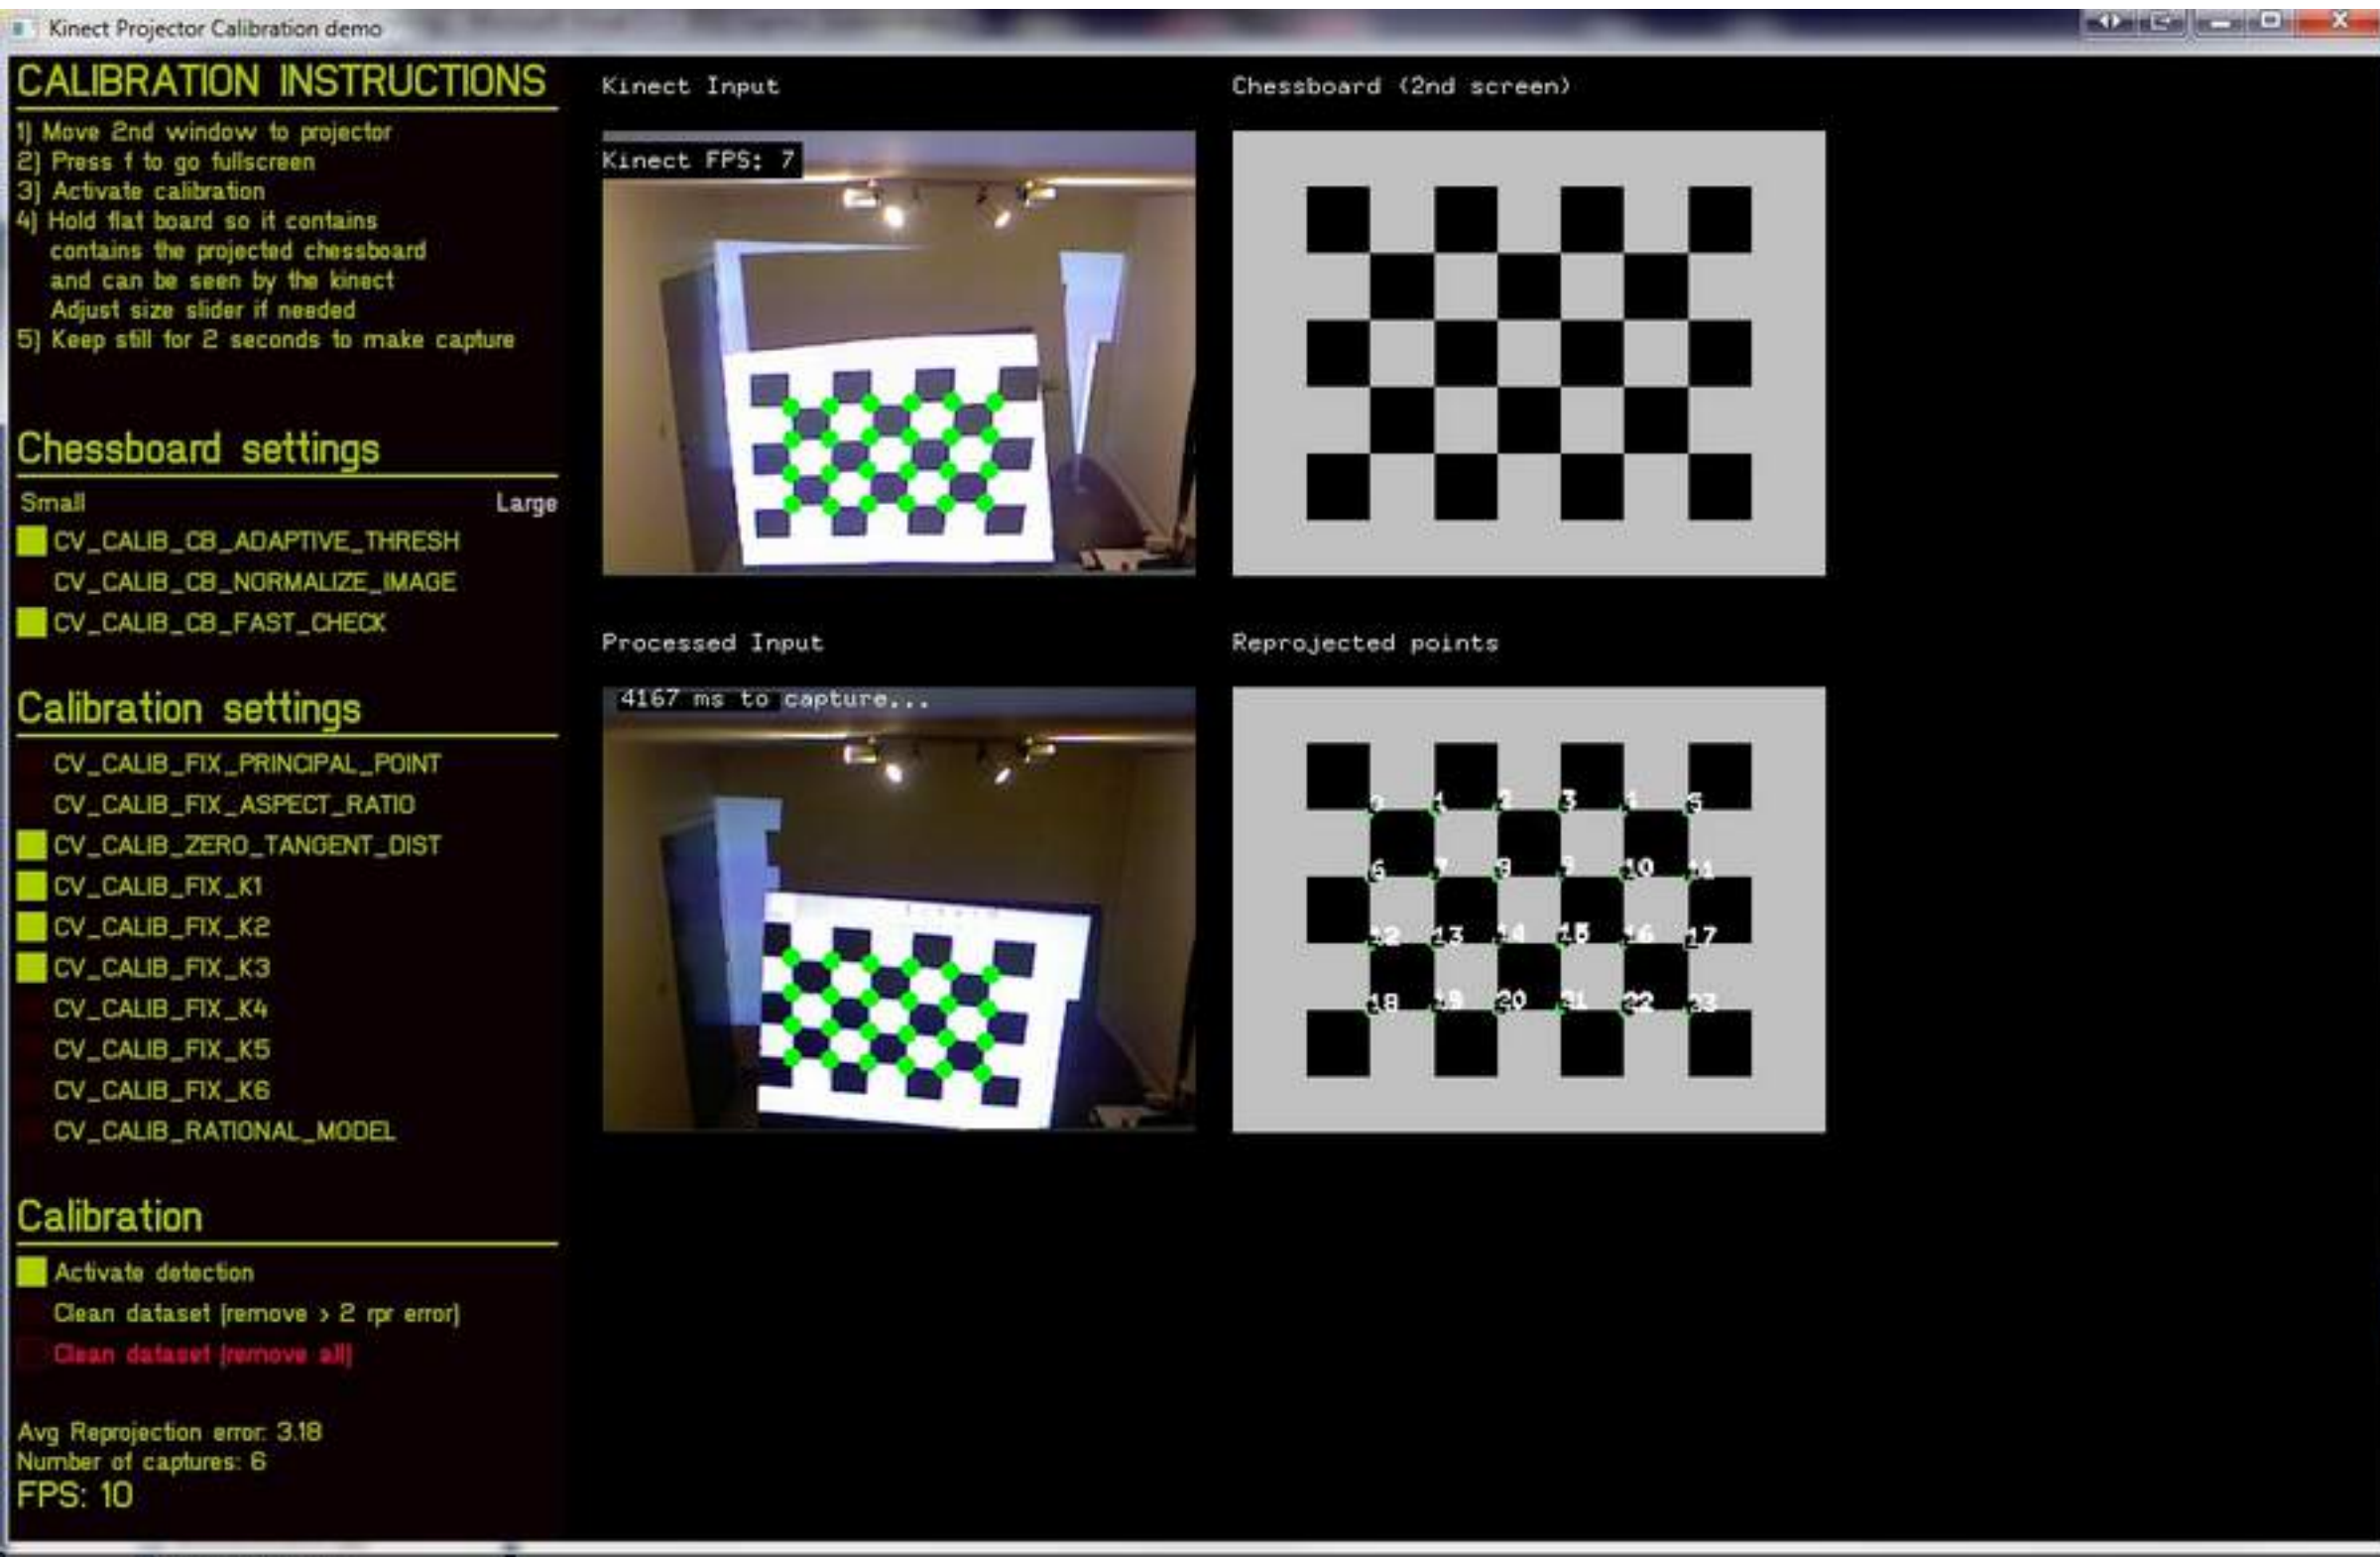

```
ObstacleAvoidance | Arduino 1.5.6-r2
ObstacleAvoidance
124
125 void setup() {
126   srand(millis());
127   Serial.begin(9600);
128
129   bot.attach();
130   bot.debug(true);
131
132   bot.setTurningSpeedPercent(80);
133
134   pinMode(leftWhiskerPin, INPUT);
135   pinMode(rightWhiskerPin, INPUT);
136 }
137
138 void loop() {
139   if (!bot.isManeuvering()) {
140     bot.goForward(speed);
141
142     // call our navigation processors one by one, but as soon as one of them
143     // starts maneuvering we skip the rest. If we bumped into whiskers, we sure
144     // don't need sonar to tell us we have a problem :)
145     navigateWithWhiskers() || navigateWithSonar(); // || .....
146   }
147 }
148

Sketch uses 11,068 bytes (34%) of program storage space. Maximum is 32,256 bytes.
141
Arduino Uno on /dev/tty.usbserial-D400W0
```

basic **electronics**

computer vision with openCV

camera - projector **calibration**

signal processing

#3

learn

- about how to **showcase your work**
- either for a research paper or an industry demo

photography, rotoscoping, video recording / editing,
webpage design, press training

photography

rotoscoping and information graphics

INNOVATION 19 July 2012

Freehand laser cutter creates instant flat-pack design

Video: Interactive table lets you make a jar holder

By Colin Barras

You could call it the rebirth of the 2D printer. A new device generates flat pack-like designs in seconds using a laser pointer and a laser cutter – the latest addition to the new field of "interactive fabrication", which promises to further help ordinary consumers become product designers.

10 JUL 2012 11:00 AM | 10 JUL 2012 11:00 AM | 10 JUL 2012 11:00 AM

press training

Laser Origami

One of the highlights from the Computer Human Interaction conference recently in Paris was laser origami. Among the delegates showing off the latest in interfaces and gesture control was a group demonstrating...

Justin:

nummy yummy

open ended project:

teams of **1-2 students**

requirements for final prototype:

must involve some **laser cut / 3D printed parts**

must involve some custom **electronics**

must involve some **code** you wrote and **data via wifi**

must be **interactive** (senses user input + does sth with it)

must **solve real-world problem**

deliveries #1:

- **everything required to replicate** your prototype
 - laser cut / 3D printable files
 - all electronics you used and where you bought them
 - the code that runs your prototype

deliveries #2:

- **a website** showcasing your work
 - a video in which you pitch your prototype
 - quality photos of your prototype
 - presentation graphics (e.g. a rotoscope)
 - log of your weekly progress at the bottom

Opportunity

Using the navigation tools from smartphones and digital technology located in the bicycle helmet, it is possible to create ways to direct cyclists through those last hundred meters.

Smartphone application for setting up ride

Helmet with embedded technology

Improved bicycle navigation

sensory helmet: <http://jicorrea.com/sensory-helmet/>

we will make time in class to

- find a team mate
- brainstorm ideas
- collect feedback
- do initial prototyping
- ...

but it's helpful to **start collecting ideas now.**

project budget

- project budget of **\$50 per student**
- + **micro-controller with wifi module**
- **breadboard** and some other basic components

reimbursement

- give Jared your receipts
- put your name on them
- you will get a check in return

free resources

- 3D printing at IDC is free
- EDS has many basic electronics on stock

**laboratory assignment /
problem set**

pset: laser cut + electronics + computer vision code

we will do an exercise for each skill you need in class

we give you all materials **on friday**
including the micro-controller

grading

no written exams

50% group project

40% laboratory assignments / problem set

10% nano-quizzes

**warm up for
your group project**

not every week, I will announce it

home works

- pass / no pass
- **small exercises**, will be helpful for group project
- **install software / setup controller**, need this for class

location

International Design Center (IDC)

N52-387

Engineering Design Studio (EDS)

38-501 (this friday!)

both have a workshop!

piazza:

post questions on piazza
do not email us!

office hours:

my office hour is Mondays, 4-5pm.
TA office hours tbd.

this is a new course!

this is the **first time we give this course,**
not everything will be perfect
but **we will try our best!**

(if you like to have everything perfect
this is not the course for you—please come back next year.)

questions?

let's take a **5 minute break!**

let's take a **5 minute break!**

end.
